

## The Tibet Healthcare Project

The Tibet Healthcare Project provides free optometry, dentistry and midwifery to people living in absolute poverty. In 2006 we successfully built a two storey hospital and are currently raising funds to educate and employ full-time Tibetan clinicians.

### Sponsor a Rokpa orphanage student

- Educate Rokpa orphanage students to degree level in Optometry, Dentistry and Midwifery
- Upon qualification they will commit to work in our hospital for a period of 1-3 years providing free healthcare
- In the future these clinicians can return to their own nomadic communities and provide cost-effective healthcare

### Sponsor a local clinician

- Sponsor a team of local clinicians to staff the free hospital until the undergraduates are trained
- These clinicians will provide work experience for the Rokpa orphanage students and supplemental training
- Local clinicians will also provide locum services and specialist consultations

**PLEASE HELP US ESTABLISH A FREE HEALTHCARE SYSTEM IN THIS REGION OF TIBET BY DONATING NOW**

A maximum of 10% (very low) administration fees apply to all donations ensuring that almost every penny you donate goes directly to those who need it.
