

Student Letters

This section shows a translation of the letters by the 6 students we are sponsoring. They are addressed to the sponsors.

April 2008

From the top of the Himalayan Mountains to the bottom of the Pacific Ocean we thank you for your help. Your body is like a golden sun which clears away the clouds. We hope you are very well.

Here we are healthy and finding our lives far less difficult than when we were younger. This school's environment is very enjoyable. The teachers are very kind to us and the students are very friendly. We have 6 lessons each day which makes 30 per week.

We are learning Anatomy, Biology, Chemistry, Computers, Chinese Politics, Chinese, English, Physics, Professional Etiquette, Chinese Medicine and Sport. We are working very hard and are finding Anatomy and Chemistry to be the most difficult. Here are our results:

Name	Anatomy	Biology	Chemistry	Computers	Chinese Politics	Chinese	English	Sport	Physics	Professional Etiquette
Rinchen Tsomo	32	87	60	62	79	64	91	65	60	73

During the winter holiday we all went home so we didn't have an opportunity to write to you at that time – sorry about that and hope you are all well.

With best wishes!
